With 7 years of professional experience, I've honed a solid understanding of web application development and a passion for crafting engaging user interfaces. At Alterian, my focus is on delivering cutting-edge experiences in customer experience (CX) technologies. I'm committed to building applications that resonate with users, aligning with Alterian's mission to innovate in real-time CX solutions. My expertise in HTML5, SCSS, and Typescript blends with a dedication to UX design, enhancing the company's offerings with both functionality and aesthetic appeal.

In my current role, I've been instrumental in developing single-page applications using the latest versions of Angular, ensuring seamless user journeys and robust performance. My collaboration with backend developers to integrate APIs has contributed to a cohesive product ecosystem. I take pride in my involvement in mentoring new team members and fostering a culture of knowledge-sharing and continuous improvement. Through meticulous unit testing with Jasmine and a knack for producing compelling graphics, I've elevated the quality and user engagement of our web applications.

Experience

Alterian - **Frontend Developer**
